connecting quality and design

Studio AccÜ Panel

One unique characteristic of wood is its ability to absorb and distribute sound waves. Acoustical panels are nothing new to the market, in fact many of the large mills producing these items purchase veneers from us.

Our Position is not to re-invent anything—only to offer more choices than the standards. The Studio AccÜ Panel is available in custom sizes, using custom veneers and even custom patterns.

RAL testing of our product will be complete in January 2017. In the meantime we can offer it produced with an FSC claim and NAUF substrates.
