## Brogan Wood Products adds lumber to it's product list.....

At the beginning of 2018, founder and CEO Scott Brogan initiated the sale of hardwood lumber to the Brogan Wood Product repertoire. "Afterall, lumber is just a thicker form of veneer", amusingly stated Brogan.

The mission of our boutique lumber sales will be to provide our clients with what the industry calls "boule form" lumber. Rather than being sawn in the traditional "square edge" method, boules are sawn through and through, maintaining the actual shape of the round log. Just as "un-clipped veneer" gives the processor the ability to clip the raw material as he or she sees fit, boule form lumber gives the same option. It also gives the manufacturer the ability to source the lumber for their project from the same log.

"A number of clients have repeatedly asked BWP to supply solid material, in addition to veneer and veneered panels for their jobs", stated Brogan. "Developing the ability to meet those needs was a logical progression."
