Brogan Wood Products introduces:

Dyed Grandis Collection

Grandis Cream Slate

Grandis Della Mink

Grandis Obsidian

Grandis is a plantation grown species and hybrid mix of Eucalyptus. The veneer itself is FSC® 100%. The natural color is more of a mahogany color, just not quite as deep. It's lighter. The wood takes a stain well.

We've added this wood to our custom dyed collection, including our Ashberry and Buttonwood.

Logs are typically quartered and then quarter sliced for a straight grain appearance.

We also have solid Grandis in Boule Form, which is lumber sawn through and through, maintaining the shape of the log.

Our production of the veneers and boules is done in the US.

*"People will forget what you said,
people will forget what you did,
but people will never forget how
you made them feel."*
