

Studio V-3 Flush Wood Door

Detail, stile and rail,
recessed panel and bead

As shown above V3 doors ready to box and ship

Our V3 Door can either be flush or stile and rail with recessed panel and a simple, but nice moulding detail. We produce these only as a primed for paint option. Veneers and special finishes are not possible in the V3 production.

Standard 3 x 7 and 3 x 8 sizes are in stock, primed for paint. If you would like us to do the machining for hardware and the finishing for you, we can. The lead time for that extended service will be based upon the production schedule at the time of your order, but since the door is already made and primed, it only needs to be machined and finished, which takes less time than starting from scratch.
