

Texture Verona™ - shown in multiple materials finishes

Our intent with this carved pattern was to be able to mix different materials and finishes into the offering. Center back is Palmwood veneer over red HDF. Left front is white Corian. Next is Palmwood veneer on blue HDF. Next is a mixture of two different color composite veneers and finally front right is rift white oak. If you job requires FSC® Certified wood, and ULEF or NAUF substrates, as long as they are available in the material we are using, we can offer the product with a certified claim.

What will your design intent be? Let us know. We have a multitude of materials available for your use. Perhaps you would like a simple solid color lacquer over MDF. Not a problem. Send us the specification on the Benjamin Moore (or other) color and we'll make it happen. Remember, these panels are fully finished, cut to specific size and ready for installation by the millwork sub or GC.
