inspired by the fingerprints of nature

Hardwood Lumber

It's been said, "you can't be in the veneer business without being in the lumber business..."

Our global connections in the hardwood industry allow us to offer hand selected materials for your projects.

We offer lumber in boule form, as seen right and below, maintaining the full form of the log, and we offer the standard sawn lumber in board form.

SGBrogan sits on a prized 20 foot Teak Boule

In addition to what we consider to be standard lumber, we also offer specialty items such as slabs from specific logs for use as "live edge" table tops.

This also includes a wide selection of burls and crotches too.

The passion for our raw material is evident in our offerings.
