New Wood for Vivente™ Laminated Glass by Intermezzo LLC

Vivente™ Laminated Glass is the top of the line laminated glass product from Intermezzo LLC. Used for elevator lobbies, accent wall panels in suite entries or board rooms and in elevator cabs - Vivente™ incorporates a state of the art, patented process during lamination of any material.

Wood Veneers from her sister company Brogan Wood Products LLC have become a specialty because of owner Scott Brogan's knowledge and expertise of the material and how to work with it across a full range of products both companies manufacture.

“Gatsby Pinstripe”

“Is one of the newest composite veneer patterns offered by Brogan Wood Products,” states owner Scott Brogan.

“We're always experimenting with different products and different veneers.

Intermezzo allows us to step outside the box and create something special for our clients because it takes what Brogan Wood Products offers and continues to add value through vertical integration of material and production”, further stated Mr. Brogan
