

Texture Moltissimo™

Simulating buildings, streets and avenues, this custom carved texture can be provided on wood veneer panels, lacquered panels, solid surface materials and even metal sheeting. Just as our Texture Verona, this product comes fully cut to size, edge banded and finished, ready for installation on Z clips. We do recommend the use of additional Z clips during installation.

Although a specific pattern, it can be adjusted to fit your design intent. Wood panels can be provided with FSC® certification, as long as the wood veneer selected comes certified.

As shown above in Rosewood Composite Veneer. Other woods available.
